How many dining rooms at the service?	2
Provide details of any outside space to which the residents have access	Secure garden that is currently under development.
Provide details of any other facilities to which the residents have access	Access to a minibus to organise regular outings

Communicating with people who use the service

Identify any non-verbal communication methods used in the provision of the service	
Picture Exchange Communication System (PECS)	Yes
Treatment and Education of Autistic and related Communication-handicapped Children (TEACCH)	No
Makaton	No
British Sign Language (BSL)	No
Other	No

Statement of Compliance

The Responsible Individual must prepare the statement of compliance.

CIW have published [guidance](#) on completing the quality of care review which provides advice on what could be contained within the statement of compliance.

Set out your statement of compliance in respect to the four well-being areas below.

The extent to which people feel their voices are heard, they have choice about their care and support, and opportunities are made available to them.

This starts with our initial preassessment when the staff member asked the prospective resident of Red Rose themselves what their needs and preferences are. This is then incorporated into the care plan upon joining us.

These care plans are reviewed monthly and regularly with the residents themselves to ensure we are meeting the needs and preferences. Also gives scope to develop the care plan further.

I have sat with residents every week when I was working from Red Rose. All residents I spoke to have given valuably positive feedback regarding their care and support, we scored very highly in all areas and all residents were complimentary of the team.

Formal resident quality assurance surveys were completed in the period, and this showed some very positive feedback on our care here. All but 1 resident said they were happy living at the home. Activities and food scored very highly in the surveys.

Regular resident meetings are held by the activities coordinator and management. This gives our residents another opportunity to give feedback and ideas for what they would like in the home. Generally, all residents are very happy in the home and despite a difficult time with visitors restrictions with Covid. They are happy with the activities schedule in the home, and they have given some lovely ideas of places they would like to visit and new activities ideas.

In passing I have spoken to a number of district nurses, GP's and other visiting professionals. All have given positive feedback about the quality of care delivered in RedRose. They have mentioned the staff are very knowledgeable of our residents and appear to have good working relationships in the home. Social workers have told me the home has a very good reputation locally which is reflected in its historically high occupancy levels and strong CIW reports.

The extent to which people are happy and supported to maintain their ongoing health, development and overall wellbeing. For children, this will also include intellectual, social and behavioural development.

Person centred care plans are written for everyone in our care which incorporates their views and opinions. I have reviewed many of these and all are well written. They reflect the needs for support well.

Medication is very well managed in the home. Regular monthly audits and ad hoc weekly checks are in place to prevent errors from arising. The medication folder is organised and includes correct PRN protocols, pictures...etc and the MAR charts are being correctly signed. This shows the health and wellbeing of our residents are being managed by the home well.

Our residents have access to visiting health professionals in a timely basis. The home has a good working relationship with our GP, DN's, CPN... etc. I had regularly reviewed our professional notes on Carevision which details every visit. Often the visiting professionals will write on Carevision themselves which has proven to be a great tool. Dentists are often difficult to arrange for care homes, however Red Rose has been fantastic in ensuring the dental needs of our service users are met by taking them to appointments regularly.

Upon speaking with our residents throughout the period, they all have described how happy they are in the home and well supported they are. The residents speak very highly of the team we have at Red Rose, where they feel the staff know them well and always feel well supported.

During the period we sent out quality assurance surveys to families. Despite having limited returned to us we did receive excellent feedback from all that replied. There was not a single negative comment and all relatives felt that we provide a good service, and they said their loved ones are happy with well supported with us.

We have been promoting independence and dignity a lot within the home, where residents are constantly supported to make their decisions every day. Residents feedback that they feel they can make choices for themselves, they choose what to eat and what to wear in the mornings. Also they choose how they day go and what activities they would like to do.

I have closely monitored staff in and outside of office hours. We have installed CCTV in communal areas throughout the home and this has brought an air of transparency in the way we work. Staff have been monitored in being kind, empathetic and compassionate to our residents. We have maintained safe staffing levels throughout the period.

The extent to which people feel safe and protected from abuse and neglect.

Safeguarding starts through our recruitment process. Upon reviewing all new starter staff files, each person has a current DBS check complete and obtained 2 satisfactory references. During the induction new staff are given our safeguarding policy to read and acknowledge. All staff complete mandatory training in safeguarding, where the entire team has completed the training in the period.

the manager has completed safeguarding referrals appropriately and timely, also with the appropriate CIW notification. Upon reviewing all safeguarding referrals, the manager already puts in place appropriate preventative safeguarding measures to which no referrals were kept open for long and social services were satisfied with how we reacted.

3 x CIW complaint came in which was an anonymous complaint about the manager and RI at the home. I completed a full investigation on this, and it was not substantiated. CIW inspector was satisfied with the investigations and report we submitted.

On admission we complete equal opportunities form (on Carevision) for each resident, to ensure we identify any protected characteristics. We use this within the care planning process to prevent discrimination of our residents. Currently the home has had all White British residents mainly from Wales and a few from England. We have previously cared for service users who are visually impaired, so we tailor our care to best meet their needs. Our activities provision for them has been specific to focus on sensory activities that they enjoys trying. We have made many purchases of sensory activities to meet their needs and to ensure they do not go without some form of social and emotional activity.

Care plans are well written and in place for all residents. I have found though that some care plans can be more person centred regarding their specific communication needs for our more advanced dementia residents.

We assess staffing levels constantly and complete regular dependency assessments using an NHS care home model. We are always within the average area. The home rarely feels rushed or too busy, and residents never appear rushed. All staff are keeping on top of their mandatory training.

The extent to which people live in accommodation that best supports their wellbeing and achievement of their personal outcomes.

Red Rose follows best practice guidance to ensure safe medication management. Staff who administer medication complete their administration of medication training, followed by 5 competency assessments and regular quarterly spot checks.

We employ a full-time maintenance person and a full-time maintenance manager who spreads their time between Red Rose and our sister home White Rose. They complete a series of weekly, monthly, quarterly, and 6 monthly tasks as a preventative measure to ensure we are compliant with health and safety. They both are part of the planning of bigger jobs and daily troubleshooting any issues that arises daily that require maintenance.

External contractors are used to cover us for all our health and safety aspects of the home:

- Fire alarms, equipment and lighting
- Gas safe
- Electrical work
- PAT testing
- LOLER and servicing of liftin equipment
- Kitchen canopy clean
- Nurse call service
- Laundry service and clean of ducts
- Legionella

These are all kept on top of and organised by us, and any remedial works are actioned promptly. The environment and equipment is kept to a high standard and maintained properly.

Health and safety advice and policies are provided by ELAS and are contactable anytime.

We have undertaken significant work in the home to ensure we provide the best environment possible for our residents. We have improved lighting in all communal areas of the home by upgrading to LED daylight lights. We have also installed CCTV in communal areas which is has become a valuable tool for the safety of our residents. We are continuously redecorating all our communal areas and bedrooms.

Speaking with our residents in the period and looking at responses from our QA's all residents feel we provide a safe environment for them to live. All feel we respect their privacy and dignity, however naturally residents prefer some to staff to others.

We have a minibus on site and regularly take out our residents on day trips and shopping trips. All residents are offered, and we ensure not the same residents are always taken out.

All residents are consulted in to give us their views in decoration ideas and also what colours their bedrooms are if they are due to be redone. I am very satisfied with how the home is coming together.

The following section requires you to answer questions about the staff and volunteers working at the service.

Number of posts and staff turnover

The total number of full time equivalent posts at the service (as at 31 March)	40
--	----

The following section requires you to answer questions about each staff type including information about the number of filled and vacant posts, the training undertaken, the contractual arrangements in place and the qualifications of those staff.

The information entered should relate to the period during which the staff member has been working for the provider only.

Staff Type	Service Manager
------------	-----------------
